VERDI

Crafted by nature,
Perfected by technology

Real Wood

Hard & Durable

Dimension Stability

Environmental Friendly

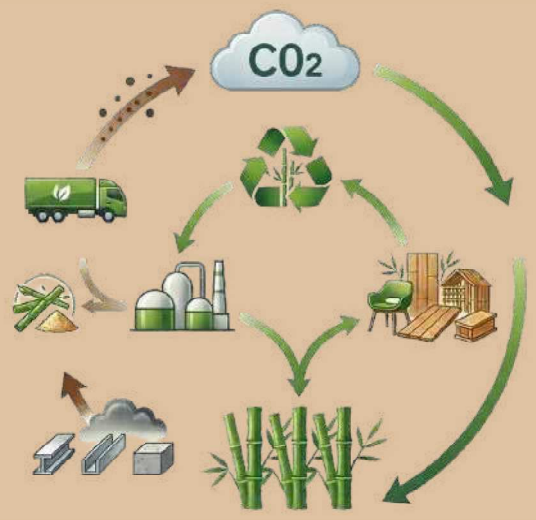
VERDI

An innovative engineered wood flooring made from bamboo, combining natural beauty with advanced technology to create a material that outperforms real wood in strength, durability, and outdoor performance.

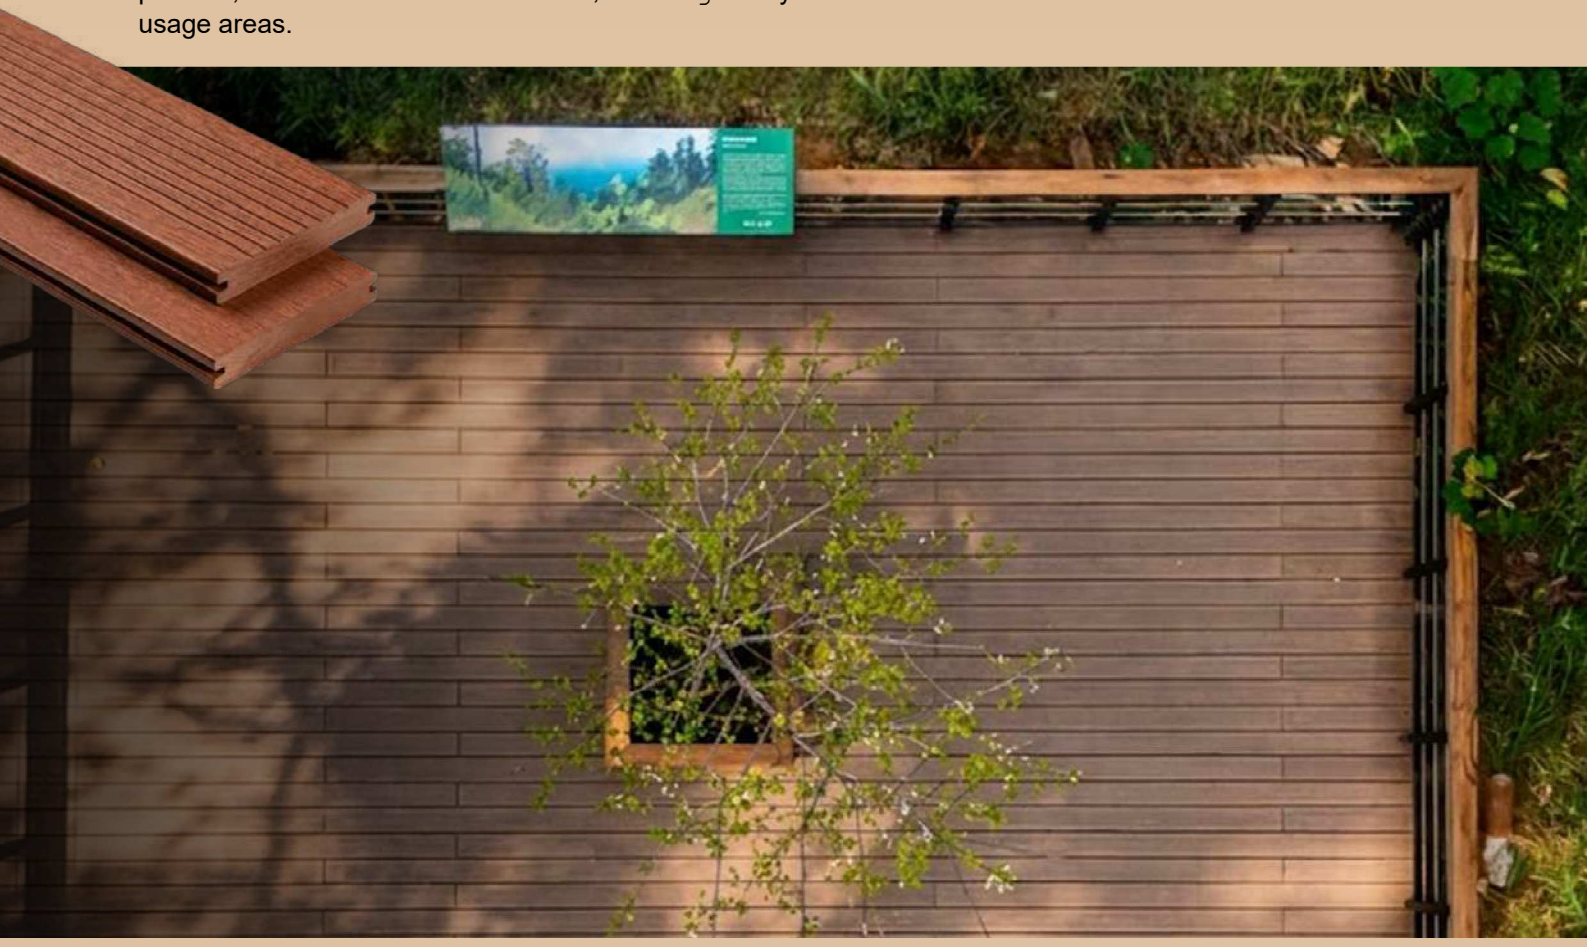
Enhances surface texture with a premium feel, elevating exterior architectural spaces with lasting elegance.

Bamboo Forest Absorbs CO_2

VERDI flooring is made from high-quality plantation bamboo that grows rapidly within 4–6 years. It helps absorb carbon and is environmentally friendly. Through a specialized production process, it is free from VOC emissions, ensuring safety for all usage areas.



Moso bamboo forests can absorb approximately 5–7 tons of CO_2 per hectare per year



Real Wood

Provides the natural beauty and feel of real wood (Natural Aesthetics) with a warm touch underfoot and a premium appearance. Ideal for outdoor areas such as terraces, poolside spaces, and common areas in projects.

Dimension Stability

Maintains excellent dimensional stability with low expansion and contraction rates. Designed to withstand outdoor environments by minimizing deformation, warping, and shrinkage caused by humidity and temperature changes.

Hard & Durable

Highly strong and durable (Durability), outperforming conventional hardwood. Its high-density compressed structure makes it stronger than teak wood and harder than typical wood by over 50%, while naturally resistant to termites and insects.

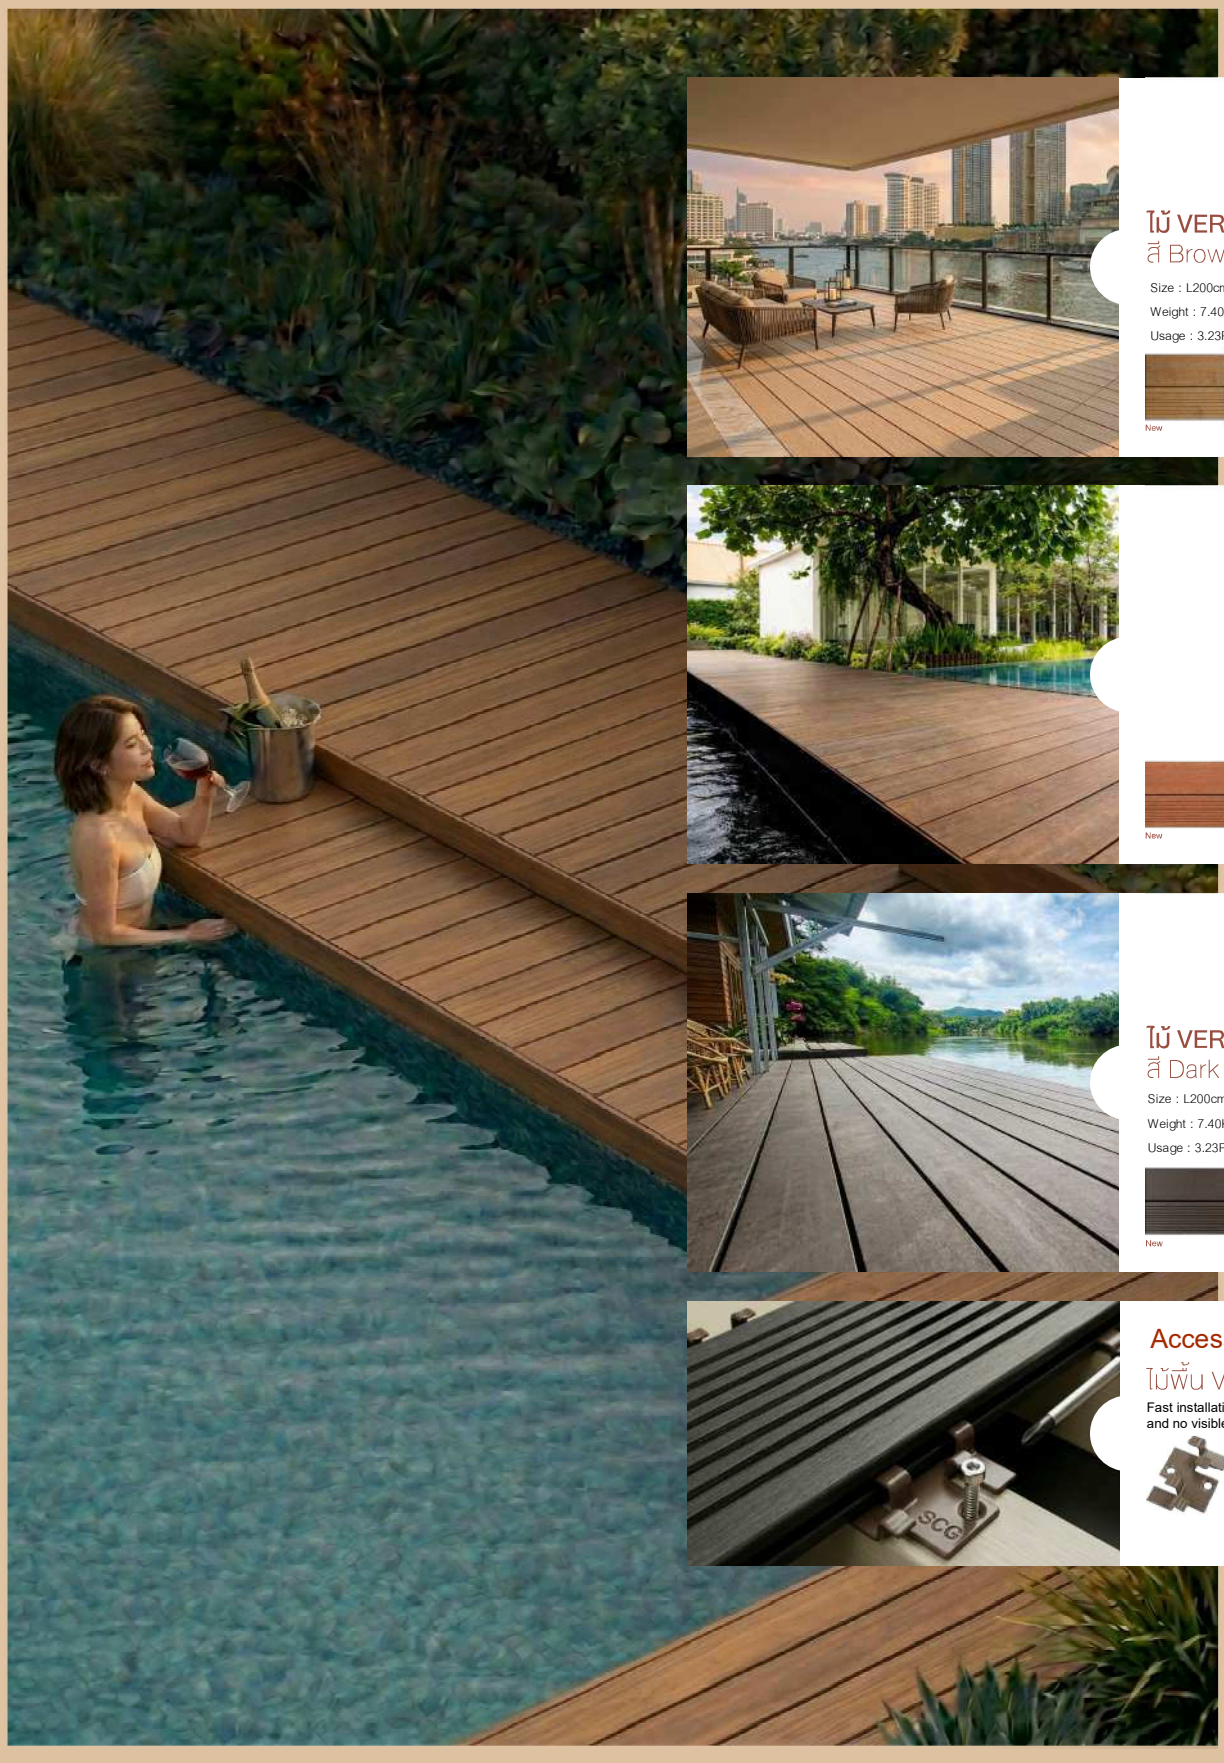
Environmental Friendly

Eco-friendly material (Eco-Friendly) made from renewable resources with high carbon absorption capability. Manufactured in compliance with international EPD standards and designed for a service life of more than 25 years.

VERDI

Designed with both smooth and grooved surface options, showcasing the unique natural grain patterns in every plank.

Comes complete with a full installation accessory set for a clean, seamless, and aesthetically refined application in every project.



ไม้ VERDI
สี Brown Teak

Size : L200cm. x W15.5cm. x T2cm.

Weight : 7.40Kg./PC

Usage : 3.23PC/SQM

New Fade (5Y) After maintenance

New Fade (5Y) After maintenance

ไม้ VERDI
สี Dark Oak

Size : L200cm. x W15.5cm. x T2cm.

Weight : 7.40Kg./PC

Usage : 3.23PC/SQM

New Fade (5Y) After maintenance

Accessories
ไม้พื้น VERDI

Fast installation with a smooth, even surface and no visible screw holes.

Stainless Clip and Screw

VERDI

Elevate outdoor spaces with a material that combines the beauty of nature with modern technology, delivering both functionality, durability, and long-term sustainability.

Because the best flooring is not only beautiful… but truly built to perform.

Technical Data Specification

Property	Test Standard	VERDI Specification
Physical Properties		
1) Density	GB/T 17657	1.1 - 1.3 g/cm³
2) Moisture Content		8 - 12 %
3) Dimension Stability		0.01 %
Mechanical Properties		
4) Modulus of Rupture	EN 408	> 100 MPa
5) Modulus of Elasticity	EN 408	> 10,000 MPa
Durability Properties		
6) Termite Resistance	JIS K1571	JIS K1571
7) Formaldehyde Emission	ISO 12460-5	≤ E1
8) Fire Resistance	EN 13501-1	B_{fl}-s1
9) Joist Spacing (on center)		30-50 cm
10) Service Life		> 20 years*

* Under normal use conditions. Applies to material durability only (no decay, through-thickness cracking, or structural failure). Installation must comply with manufacturer specifications.
