

Smartwood

Attractive, Long-Lasting Color with **COLOR
LOC**

Fascia Board

Wood Plank

Shading Plank

Floor Plank

SCG Smartwood is an innovative wood substitute product made from the superior **SCG Portland Cement, Silica Sand and Special Cellulose Fiber** using high standardized processes (Autoclave Process). **SCG Smartwood** creates a natural, attractiveness and confident look.

COLOR Superiority with LOC

Color Loc technology locks every molecule firmly into the SCG Smartwood fiber with a special spraying technique, developed especially for synthetic wood and submitted to a high temperature curing process to help lock the paint for long lasting color. Colored Smartwood stays naturally attractive. And resembles authentic for a long period of time.

3rd Layer

A clear coat for lock-in strength and a glossy finish

2nd Layer

Paint for the wood finish tones and adherence for the clear coat

1st Layer

Primer to help paint adhere to the wood

WARNING

- Never use as a structure for buildings, support, or other purposes. SCG Smartwood must be installed in compliance with the installation manual, and only standardized equipment from the manufacturer can be used.
- Never ingest or swallow. Furthermore, the dust created from cutting, grinding, drilling or injecting the product should not be inhaled.
- Do not use in areas that are wet or moist at all times.
- Do not use for flooring raised more than 50 cm or more from the ground.

CAUTION

- SCG Smartwood products have been designed with directions for use as suitable for usage conditions in Thailand only. Use outside Thailand is considered a direct responsibility of the construction designer, controller and installer.
- Wood stain products contain chemical substance and cannot be swallowed, ingested or come into contact with the eyes.
- While working, use standardized personal safety equipment; tightly close containers after work and keep away from the hands of children.
- If any skin irritation occurs with contact, hurry to rinse with water many times and see a doctor without delay.
- If swallowed or ingested, do not induce vomiting. Drink plenty of clean water in order to dilute the chemical and see a doctor without delay.
- Specifications for installation are only preliminary suggestions for general usage. The installation methods and structures used should be considered in line with EIT Standard 1015-40 for Steel Structured Buildings and the design specifications in Ministerial Regulations, 8th Edition (1994) issued pursuant to the tenets of the Act of 1979.
- Using the products outside of the usage specified in this document is considered a direct responsibility of the construction designer and controller.
- The installation manual is subject to change.
- Construction designers, controllers and installers must check to determine whether the installation manual in their possession is the most recent edition. If there is any doubt, the edition can be checked at www.scgbuildingmaterials.com
